

Fisher-informed pruning masks — pooled TRAIN (same method as silicon anchors B/C)

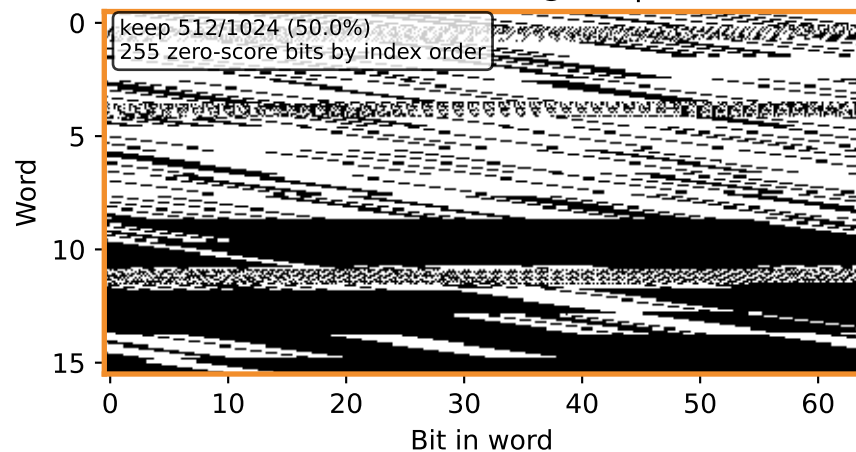

(a) Pooled Fisher score (TRAIN, 5 subjects)

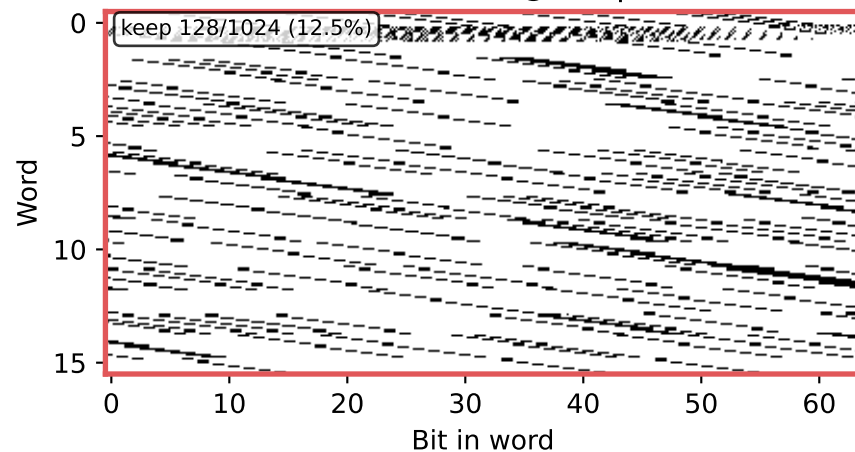

(b) Score rank — anchor cutoffs

(c) Informed mask @ keep=0.5

(d) Informed mask @ keep=0.125

257/1024 bits have Fisher score > 0; keep=0.5 mask (c) fills remainder at score=0 by bit index. Mask (d) matches silicon anchor C bitstream.
